DIRECTORY OF LABOR ORGANIZATIONS
IN MONTANA

Cooperation of labor organizations throughout Montana with local offices of the Montana State Employment Service makes possible the publication of this directory of key officials in labor unions and related organizations every two years.

Distribution is made as a public service to principal officers of labor unions, employer organizations, libraries, research centers, public officials, the press and radio, and on request to any interested individual as long as the supply lasts.

So far as it is humanly possible, the information given is current as of the beginning of 1960. Because of the many variables common to a project of this nature, changes may be expected to have occurred in a number of instances even before the directory is in print.

The Montana Unemployment Compensation Commission, through its two co-ordinate branches, has a common field of interest with all wage earners and employers in the state. Its employment service facilities are dedicated to all Montana; its unemployment insurance programs cover about two-thirds of the active labor force in the state.
